SELECTED PROJECTS

MC On-The-Go

26 May 2025 - ongoing

Tech Stack: Node.js, Express.js, MongoDB, React.js, Figma, TailwindCSS, Git, Jira, Framer-Motion

Led a team of 4 people into developing a Full-Stack social media website built exclusively for the members of the VIT Music Club to handle their day-to-day activities and events.

- Designed, developed and deployed the User-Interface for an end-to-end approvable Music Practice slot-booking system to decrease the time-hassle by 50%.
- Prepared ongoing security measures for secure log-in and band formation for the members of the music club to increase user-interaction by 30%.
- Engineered a secure admin login system to oversee the activities of a music club as well as post new events.
- Created responsive pages accross the website for multi-device configurations using TailwindCSS.
- This is a random point

Credit Card Fraud Detection

24 Jun 2025 - ongoing

Tech Stack: Python, NumPy, Pandas, Scikit-Learn, Matplotlib, Kaggle Notebook, Seaborn

Created a python notebook to analyse and understand credit card transactions.

- Created an analysis of a dataset of more than 50000 credit card transactions using Pandas and Numpy.
- Performed exploratory data analysis to eliminate irrelevant features and found relevant features for prediction.
- Compared the efficiency of multiple predictive models to predict whether a particular credit card transaction is fraudulent.
- Calculated the Accuracy of fraud prediction using confusion matrix and plots from seaborn.

Resolute

05 Jun 2025 - 24 Jun 2025

Tech Stack: Node.js, Express.js, MongoDB, React.js, TailwindCSS, Git, Multer, Cors Figma

A multi-user website application developed to provide resume building, storage and sharing options for job-applicants.

- Built APIs with user cross-validation to perform CRUD operations on applicant data
- Prepared ongoing measures for secure log-in and other privacy features for the users
- Created responsive pages accross the website for multi-device configurations using TailwindCSS.
- Maintained a multi-user online resume sharing system to increase user activity by 50%.

PROFESSIONAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, Java, Python, C++

Tools, Platforms & Deployment: Node.js, Git, Postman, MongoDB Atlas, Vite, Vercel, GitHub Pages

Frameworks, Libraries & Databases: React.js, Express.js, TailwindCSS, Cors, Multer, Mongoose, MongoDB, SQL Plus

ACHIEVEMENTS

Secretary @ VIT Music Club [Link](#)

01 Jan 2025 - ongoing

Selected to be a part of the Executive Board of VIT Music Club.

- Spearheaded multiple domains of VIT Music Club's Core team.
